Gecko Media Systems, LLC

GECKO MEDIA SYSTEMS, LLC

What it all boils down to.....

I would like to pose these couple of questions to you:

1. From any room in your home where you have a TV can you pick up you remote control, push one button to select the room your in, then select what you would like to do like "watch cable TV" and have everything power on and switch to that option?
2. Can you then merely push "watch DVD" and have everything switch and give you complete control over the DVD, Audio and TV without ever picking up another remote or pushing any other buttons.
3. From any room can you touch a small panel on the wall to easily playback DVD's, Cable TV, IPOD, etc. and hear it from you invisible overhead speakers?
4. Do you see any wires or electronics anywhere you would prefer they not be?

These are what Gecko sees as the most important part of enjoying your home and what we are able to accomplish.

Gecko Media Systems, LLC

Gecko Media Systems, LLC

Modern Home Makeover

Gecko Media Systems, LLC will be showcasing a home originally built in 1936, then moved to Pirates beach in Galveston and raised up on piers. The home will be economically equipped with all the modern controls providing ease of access for all media, lighting and security. The home demonstrates what Gecko sees as a “real life” showroom.

Unlike the big chain electronics stores this showroom provides a working model of all the various technological aspects today's homes should incorporate but don't. Gecko poses the question, “how does a retailer sell a piece of equipment without knowing the client's application and needs / wants?”

Galveston, Texas

Equipment Closet

The entire home's equipment for all the following services will be hidden away in the hallway closet. Distributed structured cabling from the closet to all areas of home will provide connectivity for:

1. Cameras
 2. Phone and Internet
 3. Audio and Video
 4. Lighting
 5. Intercomm
- 

I. Surveillance and Videoconferencing

Cameras:

1. Driveway Camera
2. Entry Camera
3. Living Room Camera
4. (2) Perimeter Cameras
5. Video Conferencing Camera

Everything that moves is recorded. Home can be remotely monitored on laptop, PC or Smart Phone. If motion is detected when there should be nothing moving, a picture of the object is sent with a notification via text messaging.

II. Phones and Internet

III. Audio and Video

1. Living Room:

IV. Lighting Controls

V. Intercomm

RTI Remote Controls

The U2 is designed for reliable wireless control of audio/video systems from environments which are too harsh for normal remote controls. It is completely sealed, making it weather resistant. The U2 combines the convenience of eight programmable "soft" buttons with an LCD display and the ideal selection of commonly used keypad buttons. The high contrast display can be customized with any combination of text and graphics desired. This provides a simple and flexible interface for operating today's sophisticated electronic systems, regardless of the location. The U2 is a perfect companion for hot tubs, pools, bathrooms, and decks.

Sleek and modern, the T2-C is the third generation of RTI's ground-breaking T2 remote control platform. Now updated with a state-of-the-art architecture including a full-color TFT LCD display, the remarkable T2-C Universal System Controller combines the power and flexibility of a fully customizable touchpanel with the convenience of 35 frequently used hard buttons. This design overcomes the need for any compromise between form, function, and technology. Innovations such as a three-way rocker switch for scrolling list navigation make the T2-C the most satisfying universal remote control you have ever used.

Niles Audio Metadata Keypads

Solo®-6MD Weather-Resistant Six-Source Master Keypad with Metadata Display

LCD Screen
Bright, high-contrast screen provides an easy-to-see interface

Metadata Display
Provides easy and intuitive operation of today's menu-driven digital sources

Weather Resistant
Add convenient control in locations such as bathrooms, spas, or outside by the pool

System-Wide Off
A single press turns off the zone; a press-and-hold turns off the entire system

Custom-Tailored Sound
Separate bass, treble, and variable loudness controls for each zone

Complete Control

The Solo-6 MD keypad is like having your entire entertainment system right in front of you, even if it is hidden away in a cabinet or closet. That's because the keypad provides complete control of everything, including the convenience of up-to-the-minute metadata, including source menus, playlists, radio station information, and much more.

Designer colors

The Solo-6 MD comes with white, light almond, and bone color change kits.

Get Into Your Zone™

Niles Audio Multi-Zone Receiver

ZR-6 Multizone Receiver

Six Sources. Six Zones

The ZR-6 can play up to six sources of music in six zones of the house, simultaneously. The whole family can enjoy their favorite entertainment throughout the home with independent local control. Need more zones? Add more ZR-6 MultiZone Receivers and expand the system up to 18 zones.

High-Performance Digital Amplifier

An advanced digital amplifier delivers robust power with superior sound quality. Its 4-ohm stable design allows you to install up to four 8-ohm speakers in a single zone.

Built-In AM/FM Tuner

A digital tuner with 20 preset stations is built right into the ZR-6 MultiZone Receiver, so it plays music right out of the box without additional components and wiring.

Music—Where, When And How You Want It

Rejuvenate with the classics by the pool...cook up hot and spicy sounds in the kitchen, or set the perfect mood for entertaining at the touch of a button. With the ZR-6, your friends and family will experience home entertainment that breaks through the boundaries of traditional music systems.

Life of the Party

Having guests over? The ZR-6's Party Mode turns on all zones (or a preset number of zones) to play the same source of music—instantly and conveniently filling your entire house with music. When the party's over, one touch of a button turns everything off.
